

Aref Shadbakhsh

Full-Stack Software Engineer | Technical Lead | CTO

+98 933 889 9794 | aref.shadbakhsh@gmail.com | Rasht, Guilan, Iran
<https://www.linkedin.com/in/aref-shadbakhsh-05a95b194/> | <https://github.com/arefshadbakhsh>
Address: Yas Building, Mir Agha Alley, Taleghani Street, Rasht, Guilan, Iran

Professional Summary

Full-stack software engineer and technical leader with 8+ years of experience building production B2B/B2C, marketplace, blockchain, and AI-enabled platforms. Strong hands-on background in Kotlin and Java with Spring Boot, Angular, React, Next.js, PostgreSQL, Redis, Docker, CI/CD, and observability. Career growth from software development to team leadership, project management, and CTO responsibility, with continued involvement in architecture, code review, releases, and incident resolution.

Core Skills

Backend & Architecture	Kotlin, Java, Spring Boot, Spring Data JPA, Hibernate, REST APIs, microservices, domain modeling, Redis
Frontend & Product	Angular, React, Next.js, TypeScript, JavaScript, HTML, CSS, responsive UI, Figma collaboration
Data & AI	PostgreSQL, SQL, Flyway, Neo4j, Python, FastAPI, AWS Bedrock, RAG, embeddings, vector search, AWS Glue Jobs
DevOps & Reliability	Docker, Docker Swarm, Nginx, GitLab CI/CD, Linux, Prometheus, Grafana, Loki, production troubleshooting
Leadership & Delivery	Technical architecture, project management, Scrum, code review, release management, stakeholder communication

Professional Experience

Full-Stack Developer / Frontend Lead / Project Manager / CTO | Bogzin | 2022 - Present

Kotlin, Spring Boot, Angular, Next.js, PostgreSQL, Redis, Docker Swarm, Nginx, GitLab CI/CD

- Advanced through 4 roles - Frontend Developer, Frontend Lead, Project Manager, and CTO - while maintaining hands-on responsibility for back-end and full-stack engineering.
- Direct a 10+ member cross-functional team spanning 4 disciplines: front-end, back-end, design, and support. Set priorities, review merge requests, coordinate releases, and explain technical trade-offs to executives and stakeholders.
- Oversee engineering across 6 product domains: business verification, order and payment lifecycles, wallet and refund operations, inventory reservation, administration and reporting, and internal operational tools.
- Strengthen scalability and service reliability through architecture reviews, Redis caching, PostgreSQL analysis, Docker Swarm deployments, Nginx configuration, GitLab CI/CD automation, monitoring, and incident response.

Full-Stack Developer / AI Backend Developer / Project Manager | Confidential Industrial Analytics Product | 2025 - 2026

Product: Digital Analytics and Decision Support Platform for Industrial Applications

Java, Spring Boot, Python, FastAPI, PostgreSQL, Neo4j, Redis, AWS Bedrock, SageMaker, AWS Glue

- Managed coordination between engineers and stakeholders while contributing directly to back-end implementation for a confidential industrial analytics product.
- Engineered a 5-stage RAG pipeline covering document ingestion, text extraction, chunking, embeddings, and retrieval for context-aware decision support.
- Connected 3 data stores - PostgreSQL, Neo4j, and Redis - to AWS services for model inference, knowledge relationships, caching, and lightweight ETL processing.
- Preserved client confidentiality while documenting architecture decisions, implementation outcomes, and operational constraints.

Frontend Team Lead / Backend Developer / Scrum Master / Project Manager | Nilasoft | 2020 - 2023

Angular, React, Java, Spring Boot, PostgreSQL, GitHub/GitLab, Jira, Trello

- Took on 4 distinct responsibilities during a 3-year tenure - Frontend Team Lead, Backend Developer, Scrum Master, and Project Manager - while supporting Angular, React, Java/Spring Boot, and PostgreSQL initiatives.
- Built user-facing functionality with 2 front-end frameworks, Angular and React, integrated REST APIs, and contributed to PostgreSQL-backed features.
- Standardized 5 engineering practices: source control, code review, sprint planning, task tracking, and release coordination.

Intern / Frontend Developer | Nilasoft | 2018 - 2020

Angular, TypeScript, JavaScript, HTML, CSS

- Earned promotion from Software Development Intern to Frontend Developer within 2 years by implementing Angular features, forms, API integrations, and reusable UI components.

Selected Projects

Bogzin Platform - B2B/B2C commerce and business management platform. Contributed to front-end and back-end engineering, architecture, business verification, order and payment processing, wallet and refund operations, inventory reservation, deployment, and service reliability.
<https://www.bogzin.com>

DecentraBnB - Blockchain-based travel protocol connecting consumers and travel businesses through smart contracts and decentralized content incentives. Served as Frontend Developer and Frontend Team Lead, with additional Java/Spring Boot and PostgreSQL contributions.
LinkedIn: <https://www.linkedin.com/company/decentrabnb/> | Facebook: <https://www.facebook.com/DecentraBnB/>

MARCO ICO - Tourism-focused Ethereum ERC-20 ICO and decentralized travel product. Implemented user journeys, reusable interface components, API integrations, and supporting platform functionality.
<https://foundico.com/ico/marco.html>

Digital Analytics and Decision Support Platform for Industrial Applications - Confidential industrial product combining document processing, data services, retrieval-augmented generation, graph-based search, and decision-support capabilities.
Public project URL intentionally omitted to preserve client confidentiality; professional reference listed below.

Leadership & Production Delivery

- Convert business objectives into architecture decisions, implementation plans, acceptance criteria, release scope, and cross-team priorities.
- Facilitate code reviews and technical discussions, align front-end and back-end dependencies, and guide engineers through feature implementation and production incidents.
- Diagnose reliability and performance issues using application logs, SQL analysis, Spring Boot Actuator, JVM diagnostics, Prometheus, Grafana, and Loki.

Education

Bachelor's Degree in Computer Engineering | University of Guilan | GPA: 15.71/20
<https://www.guilan.ac.ir/>

Master of Science (M.Sc.) in Computer Engineering - In Progress | Islamic Azad University
<https://iau.ir/>

Languages

Persian: Native | **English:** Professional working proficiency
