

Aref Shadbakhsh

Full-Stack Developer | Technical Lead | CTO

aref.shadbakhsh@gmail.com | +98 933 889 9794 | Remote / Iran

Professional Summary

Full-Stack Developer and technical leader with experience since 2018 across frontend, backend, DevOps, project management, and CTO-level responsibilities. Skilled in Angular, React, Next.js, Spring Boot, Kotlin, Java, PostgreSQL, Docker, Docker Swarm, Nginx, GitLab CI/CD, and production troubleshooting. Experienced in building and managing e-commerce, marketplace, cryptocurrency, admin-panel, payment/order, inventory, and AI/RAG systems. Experienced in collaborating with engineering teams, contributing to product/design discussions, Figma-based reviews, Jira/Trello/GitLab workflows, release management, and stakeholder communication.

Core Skills

Backend	Kotlin, Java, Spring Boot, Spring Data JPA, Hibernate, REST APIs, Redis caching
Frontend	Angular, React, Next.js, TypeScript, JavaScript, HTML, CSS, Figma collaboration
Database	PostgreSQL, Redis, Neo4j, SQL, Flyway, data modeling
DevOps / Cloud	Docker, Docker Swarm, Nginx, GitLab CI/CD, Linux; intermediate-level AWS/GCP experience
AI / Data	Python FastAPI, AWS Bedrock, intermediate-level SageMaker experience, AWS Glue Jobs, RAG workflows, embeddings, vector search
Basic Familiarity	Kubernetes fundamentals, Ansible basics, AI-agent workflow concepts
Leadership	Project management, Scrum Master experience, team coordination, code review, release management, technical architecture

Professional Experience

Full-Stack Developer / Frontend Lead to Project Manager to CTO | **Bogzin** | 1401-Present / 2022-Present

Spring Boot Kotlin, Angular, Next.js, PostgreSQL, Redis, Docker Swarm, Nginx, GitLab CI/CD

- Started as Frontend Developer and Frontend Lead; became Project Manager from 1402 to 1404 while also supporting backend development; became CTO in 1404 / 2025.
- Managed and coordinated a 10+ member cross-functional team across frontend, backend, design, and support; assigned Jira tasks, conducted GitLab code reviews, managed releases, and communicated with the CEO and stakeholders.
- Developed and maintained full-stack product features using Spring Boot Kotlin, Angular, Next.js, PostgreSQL, Redis caching, and REST APIs.
- Worked on business verification, order/payment lifecycle, wallet/refund flows, inventory locking/reservation, admin dashboards, and operational tools.
- Designed technical architecture with team members and improved production stability through Docker Swarm, Nginx, GitLab CI/CD, monitoring, and troubleshooting.

Full-Stack Developer / AI Backend Developer / Project Manager | **3D Continuum and Custom AI/RAG Projects** | 1404-1405 / 2025-2026

Spring Boot Java, Python FastAPI, PostgreSQL, Neo4j, Redis, AWS Bedrock, SageMaker, AWS Glue Jobs

- Worked as developer and project manager, coordinating with team members and stakeholders on AI/RAG product delivery.
- Built backend services for custom RAG chatbot workflows using FastAPI, Spring Boot Java, PostgreSQL, Neo4j, Redis caching, and AWS services.
- Worked with document ingestion, text extraction, chunking, embeddings, vector search, and retrieval workflows.
- Used AWS Bedrock for AI/LLM workflows, gained intermediate-level SageMaker experience, and worked with AWS Glue Jobs for simple ETL / big-data processing.

Frontend Team Lead / Backend Developer / Scrum Master to Project Manager | **Nilasoft** | 1399-1402 / 2020-2023

Angular, React, Spring Boot Java, PostgreSQL

- Led frontend development, contributed to backend services, and acted as Scrum Master before moving into project-management responsibilities in 1401-1402.
- Worked with Angular, React, Spring Boot Java, PostgreSQL, API integration, sprint planning, task management, and team coordination.
- Set up and worked with GitHub/GitLab workflows, Jira, Trello, and custom internal management tools.

Intern / Frontend Developer | **Nilasoft** | 1397-1399 / 2018-2020

Angular, TypeScript, JavaScript, HTML, CSS

- Started professional software development as an intern and progressed into frontend development.
- Implemented Angular UI features, forms, API integrations, and reusable frontend components.

Selected Projects

Bogzin Platform	B2B/B2C commerce and business-management platform. Worked on frontend, backend, admin operations, business verification, order/payment lifecycle, wallet/refund flows, inventory locking/reservation, DevOps, and production stability.
MARCO ICO	Cryptocurrency/ICO project at Nilasoft. Implemented frontend features, platform user-interface flows, API integration, and product workflow support.
DecentraBNB	Cryptocurrency/blockchain-related project. Worked as Frontend Developer and Frontend Team Lead with backend contribution using Angular/React, Spring Boot Java, and PostgreSQL.
Vital MVP	Short MVP project around 1403/02/01 to 1403/03/30. Contributed to rapid implementation and delivery of product features.
Custom AI/RAG Chatbot	Built and managed RAG chatbot backend workflows with FastAPI, Spring Boot, Neo4j, PostgreSQL, Redis, AWS Bedrock, intermediate-level SageMaker experience, and AWS Glue Jobs.

Technical Leadership & Delivery

- Translated business and product requirements into implementation tasks, release plans, and cross-team delivery priorities.
- Reviewed GitLab code, coordinated frontend/backend implementation, and supported team members during feature delivery and production issue resolution.
- Used monitoring, logs, SQL analysis, Spring Boot Actuator, JVM/application diagnostics, Prometheus, Grafana, and Loki to investigate stability and performance issues.

Education

Bachelor's Degree in Computer Engineering | Master's Student in Computer Engineering

Languages

Persian: Native | English: Professional working proficiency
